## Empowering Migrants Through AI & Automation

 We are thrilled to share the first updates on Migrantpreneurship 2.0 (MEANS 2.0), an Erasmus+ initiative designed to empower adult migrants by enhancing their self-entrepreneurship skills through AI and automation. Our journey has begun, and we have exciting milestones to report!

## New Partnerships Formed

## Kick-off meeting in Timisoara

On 26th November 2024, project partners from Romania, Estonia, and Spain gathered in Timisoara, Romania for the official Kick-Off Meeting. Each organization contributed two representatives, and together we explored key project management aspects, outlined responsibilities, and set the course for the project's development. Discussions covered:

-  Project management strategies
-  Timeline and deliverables
-  Next steps for implementation

The meeting laid a strong foundation for collaboration and ensured alignment across all partners.

## Needs Assessment Survey Underway

Currently, we are conducting a needs assessment survey to evaluate the knowledge, skills, and challenges faced by adult migrants and trainers regarding AI, automation, and digital tools for self-entrepreneurship. The insights gathered will help us:

- Address knowledge gaps
- Enhance digital literacy and technical competencies
- Build confidence in adopting AI-driven solutions

The needs assessment survey can be accessed on the project website.
